

Aerial,  
Suggested changes.  
Thanks  
Ron Ott

Page 1, salmon, steelhead, striped bass and smelt.....

Page 2, Paragraph 5

Another problem shared by alternative 2 and to a lesser extent is alternative 3 is what CALFED Ron Ott calls "double-exposure." Fish in the system that encounter the new screens at Hood a proportion could potentially be exposed to the screens at the South Delta water projects, resulting in double the stress.
